

## carbon wheel guideline

### Do

- check wheels and brake surface before and after each ride
- clean the wheels on a regular basis (water + soap)
- apply good air pressure (6 – 8 bar)

### Not

- avoid too short valves (min. 2 cm outside the rim)
- do not use other brake pads (only edco certified)
- don't drive off-road
- stop riding in case of an issue/crash
